Practical experience. Reliable execution.

Ray Engineers & Construction was started in 2019 and works under the Companies Act. We do mechanical work, piping fabrication, equipment installation and structural work for industrial projects.

We also lay water pipelines for irrigation projects and supply skilled manpower of every trade. Over the years we have finished many projects to the satisfaction of our clients.

We take on work anywhere in India. Our engineers, supervisors and workers travel to site and stay until the job is done — and the same team handles the workshop and the field, so fabrication and erection stay in one pair of hands.

THE PEOPLE BEHIND THE WORK

2019	6	Pan India	Own team
Year established	Core areas of work	Where we work	Workshop and site

What we are working towards.

OUR VISION

A trusted name in the water sector.

To be a trusted name in mechanical piping and civil construction in the water sector, through quality work, new ideas and reliable delivery.

OUR MISSION

Work that is delivered as promised.

To give reliable mechanical piping and civil construction services in the water sector — good workmanship, strict safety and projects finished on time.

Flare-line skid under fabrication in our workshop.

03 — WHAT WE DO

The right skills for the work ahead.

From pipe fabrication to equipment erection, we cover the work an industrial or water project needs.

01

Piping & fabrication

Pipe fabrication, welding, cutting, drilling and skid fit-up for industrial installations.

02

Water pipelines

Pipeline laying, joint assembly and related civil works for water and irrigation projects.

03

Fire line works

Fire-fighting pipelines, pump house piping and jetty fire lines for industrial facilities.

04

Equipment & skid installation

Fabrication, fitting, erection and commissioning of CNG and non-CNG compressor packages.

05

Structural works

Structural fabrication and erection to support industrial equipment and project installations.

06

Manpower supply

Engineers, supervisors and skilled workers to support mechanical and construction work.

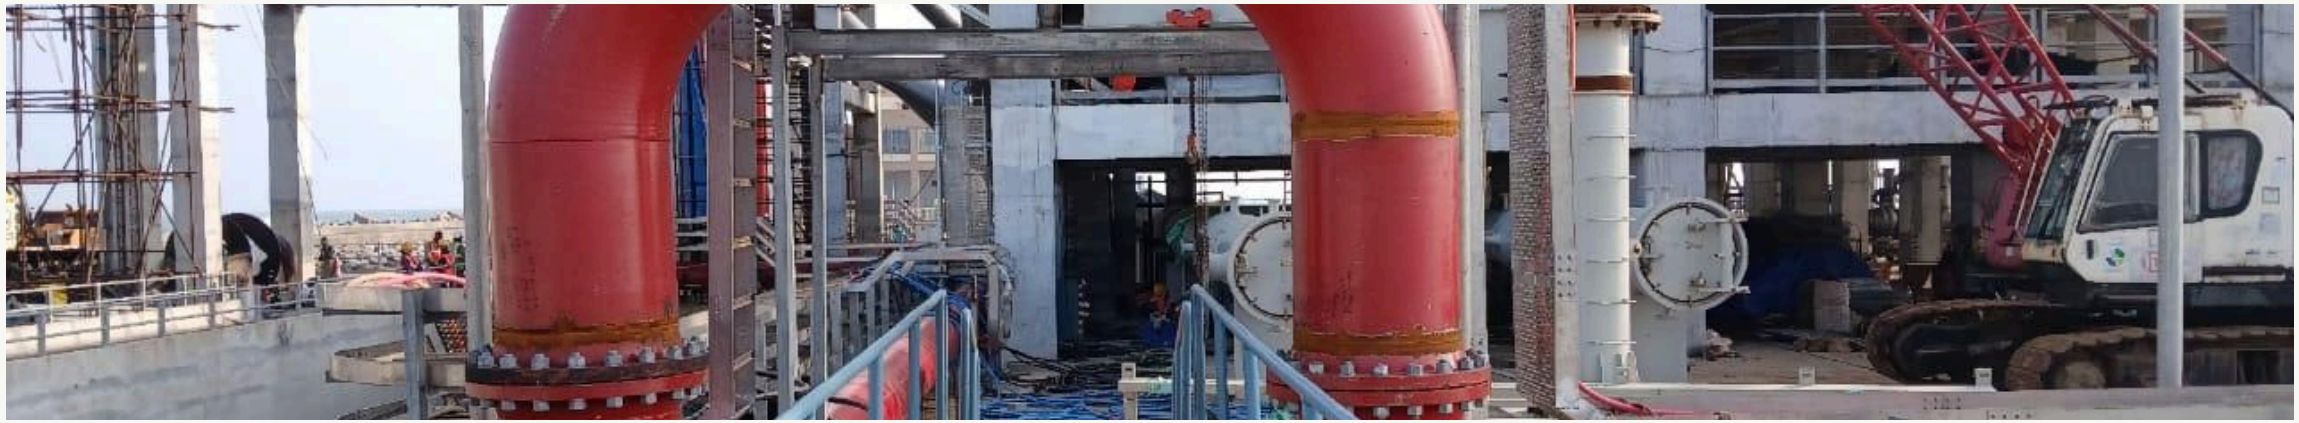

A record of work across industries.

PERIOD	SCOPE OF WORK	CLIENT	SITE / CONTEXT
2019	Bhagyam Field piping & manpower	Sterling & Wilson	CAIRN Energy, Barmer
2019	Manpower supply	Lakshya Powertech	CTF ONGC, Ankleshwar
2020	Manpower supply	Bullows EPC Pvt. Ltd.	Sunflag VSA
2020	Fuel transfer system & HSD tank works	Lakshya Powertech	L&T / Wipro
Since 2019[1]	CNG & non-CNG compressor works	Kirloskar Pneumatic Co. Ltd.	Fabrication, erection & commissioning
2023–24	Fire-fighting works	Sterling & Wilson	Adani Hazira Port
2024–25	IOC captive POL / LPG marine works	Sterling & Wilson	Marine facilities
2025–26[1]	Flare line works	Kirloskar Pneumatic Co. Ltd.	ONGC Hazira, Gujarat
2025–26[1]	Refrigeration package	Kirloskar Pneumatic Co. Ltd.	Reliance Industries Limited

1 — Dates and continuing assignments are taken from our records. They do not show current project status.

Companies we work with.

06 — OUR WORK

Real sites.
Real work.

Every photograph in this profile is from our own projects and our own workshop.

Fire-fighting piping installed along a jetty — fabrication, laying, fit-up and testing by our site team.

JETTY FIRE LINE

Across pipelines, skids and structures.

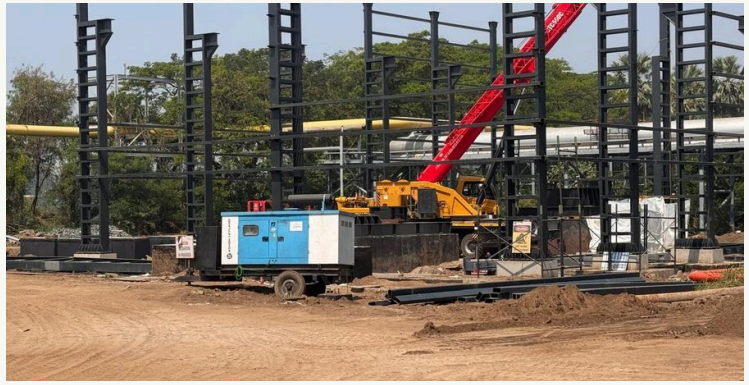

Large-diameter water pipeline in trench

Compressor equipment erection

Fire pump house piping

Structural erection at site

Skid fit-up in the workshop

Pipe joint assembly on site

07 — WHY WORK WITH US

Experienced people. A clear commitment.

Six things we hold ourselves to on every job we take on.

01

Experienced and skilled team

Qualified engineers, supervisors and skilled workers who know the job.

02

Water pipeline expertise

Pipeline installation, mechanical piping and civil work for water projects.

03

Quality that lasts

We follow strict quality standards so the work holds up in service.

04

Safe, timely delivery

Clear planning and coordination to finish within the agreed time.

05

Fair cost

Practical, economical solutions without cutting quality.

06

Long-term relationships

Dependable service, and clients who come back with the next job.

Let’s discuss your next project.
